continued...

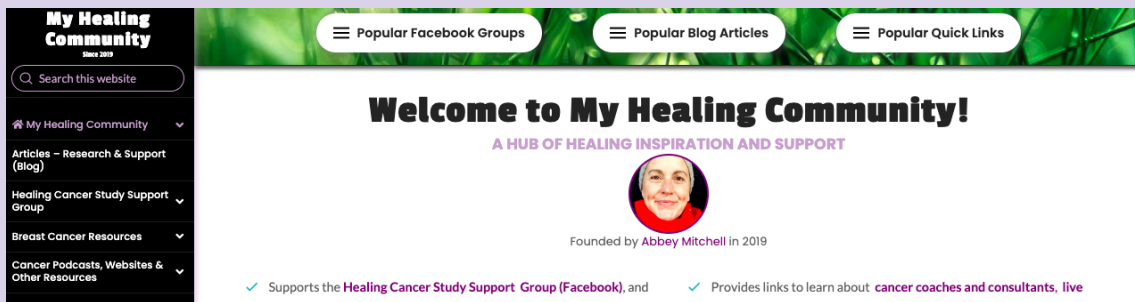

In 2019 I created a website for the group members.

The website is: www.MyHealingCommunity.com

The website offers support in accessing all the incredibly valuable conversation threads and files that have evolved within the Healing Cancer Study Support Group

In 2023 the MHC website had a complete make-over.

I hope you find time to visit and bookmark this group's new website (same URL as always) www.myhealingcommunity.com

You can access an ever increasing list of free resources via the website's main menu including:

More details *about* this private Facebook study support group that you have just joined:

MCS Formulas

"MCS FORMULAS ARE A TRUSTWORTHY & RELIABLE SOURCE OF HIGH QUALITY SUPPLEMENTS CREATED FOR CANCER PATIENTS"

MCS donate 50% to improve and extend life of cancer patients

MCS Formulas is a food supplement company founded by a scientist (Daniel Stanciu, PhD). Daniel's number one goal is to provide some of the most effective food supplements that cancer patients need, while also paying important attention to purity.

The MCS formulas company was set up and exists to fulfil the role of donating the lion's share of annual profits to support the transition of academic discoveries to clinical space. Discoveries with high potential to add value to the life of cancer patients, but that are not supported by anyone (as there is no underlying financial incentive).

Many of MCS Formulas products are best in the world in terms of amount of active ingredients and bio-availability support. The company is known for scientific expertise and care for cancer patients and they ship their products to nearly everywhere around the World.

You can use **discount code abbey5
for **5% off** all **MCS Formulas**!**

About Abbey Mitchell

Founder of My Healing Community, Co-creator of the Breast Cancer Pathways Worksheet and Lead Admin and Founder of The Healing Cancer Study Support Group.

Hi, I'm an Aussie living a simple life in the bush just 5 minutes from the sea on the beautiful mid-north coast between Sydney and Brisbane. The area I live in is called Valla, NSW.

I was diagnosed with lobular breast cancer in 2014 at the age of 43 and discovered the breast cancer had metastasised to about 9 places in my bones 2017. It's now 2023 and I am feeling better physically, mentally and emotionally than I have in my entire life. I still visit my oncologist every 3 months to discuss my pathology reports and have a CT/Bone scan at least once a year but so far all we have to discuss is healing or slight ups and downs of my tumor markers that have remained in the normal range since 2018.

If you are interested to learn more about my personal healing journey you can read my messy old blog and listen to a couple of interviews I've given at www.healingbreastcancer.info
